

**Visualization Matching Game**

R.No: 8    Reg. No: 192424141    Name: Bharani Dharan S

Each chart on the left (A-J) matches exactly one description on the right (1-10). Write the matching number next to each letter's blank.

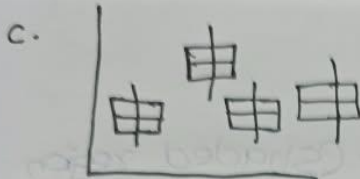

|    |                                                                                     |                                                                    |
|----|-------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| A. |    | 1.<br>Compares distributions across groups and highlights outliers |
| B. |    | 2.<br>Compares amounts across separate categories                  |
| C. |    | 3.<br>Shows how a cumulative total changes over time               |
| D. |    | 4.<br>Shows magnitude across two categories using color intensity  |
| E. |   | 5.<br>Shows how a value changes over time                          |
| F. |  | 6.<br>Shows how parts contribute to a whole                        |
| G. |  | 7.<br>Shows three variables at once using position and size        |
| H. |  | 8.<br>Shows the distribution of a single continuous variable       |
| I. |  | 9.<br>Shows part-to-whole composition across categories            |
| J. |  | 10.<br>Shows the relationship between two continuous variables     |

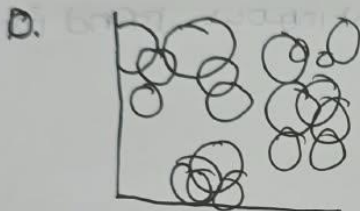

A. Scatter plot (dots plotted along two numerical axes)

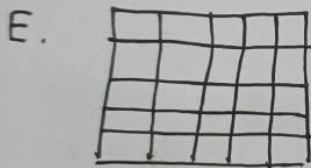

B. Stacked Bar chart (bars divided into segmented colour blocks)

C. Box Plot (boxes showing quartiles, medians, and outlier points)

D. Bubble chart (circles positioned on axes with varying sizes)

E. heatmap (grid matrix with shaded color intensity cells)

F. Bar chart (individual vertical bars representing discrete categories)

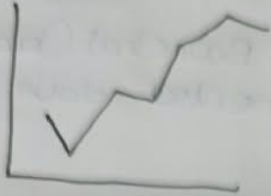

G. histogram (continuous bars distribution showing frequency)

H

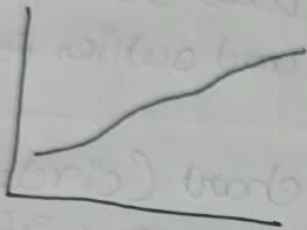

Pie chart (circle divided into proportional slices)

I.

Line chart (data points connected by line segments across intervals)

Area chart (shaded region under a continuous trend line)
