Roll No: **8**

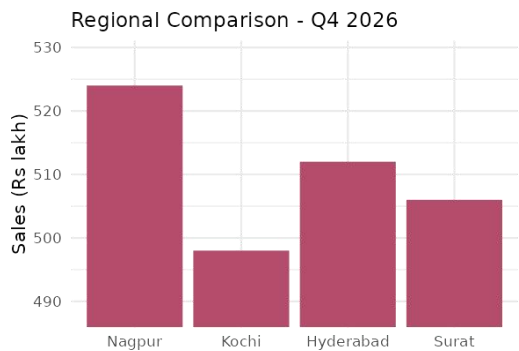

Chart 1

Market Share by Product (10 categories)

Chart 2

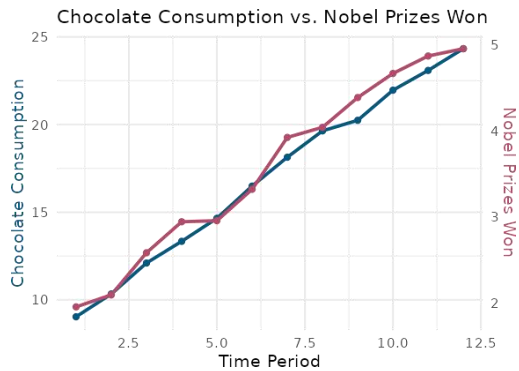

Chart 3

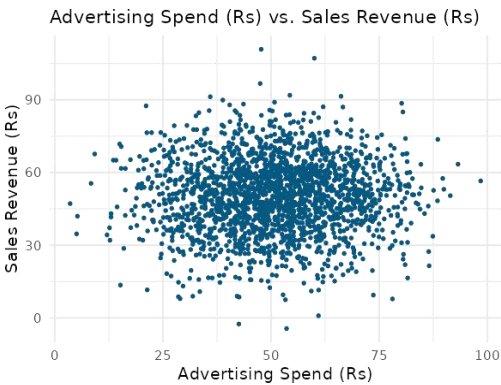

Chart 4

chart 1 - Regional Comparison - Q4 2026

The bar chart compares the sales of Nagpur, Kochi, Hyderabad and Surat.

- * Nagpur has the highest sales, approximately ₹524 lakhs

- * Kochi has the lowest sales, approximately ₹498 L

- * Hyderabad has around ₹512 L sales

- * Surat has around ₹506 L sales

- * However, the chart is misleading because the y-axis starts around ₹490 L instead of ₹0

- * Because of the truncated y-axis, the difference because the bars look much bigger than the actual difference

- * For example Nagpur appears dramatically higher than Kochi, although the actual difference is only about ₹26 L

- * Better method: The y-axis of a bar chart should normally start from zero

Conclusion: The chart gives correct data but presents the differences in an exaggerated visual way.

chart 2 - market share by Product

The Pie chart Shows the market Share to different Products.

- * the charts use 10 different categories / slices
- * each category is represented by a different color
- * it is difficult to accurately compare similarly sized slices.
- * human beings are generally better at comparing lengths than angles or areas.
- * with many categories the colors and boundaries become confusing

chart 3 - Chocolate consumption vs Nobel Prize won

- * The chart uses two different y-axis.
- * The left y-axis represent Chocolate consumption
- * The right y-axis represent Nobel prizes won
- * The two lines appear to move together and therefore may look correlated

chart 4 -

Chart 4 - Advertising Spend vs Sales Revenue (marks)

The scatter plot shows the relation between Advertising

* The x -axis represents Advertising Spend.

* The y -axis represents Sales revenue.

* The chart contains a very large number of data points.

* many points overlap in the central region
